SCCOOS brings together coastal observations along the Southern California Bight to provide information necessary to address issues in coastal water quality, marine life resources, and coastal hazards.

Working interactively with local, state and federal agencies, resource managers, policy makers, educators, scientists and the general public, SCCOOS will improve our understanding and delivery of coastal observations, and will allow us to better manage our coastal ocean environment.

JOIN US!
Southern California Coastal Ocean Observing System (SCCOOS) Working Group Meeting for Data Providers and Users

Join us for an overview of SCCOOS, a moderated discussion on optimal monitoring activities and data products, and an individual question and answer session with SCCOOS data managers. Working group categories include:

Water Quality
Marine Life Resources
Coastal Hazards

27 OCTOBER 2005
5:30PM
HUNTINGTON BEACH WATERFRONT
Hilton - Salon A
